Erection of Filter and ducts at Eramet Porsgrunn, Norway

Maciej Pasturczak has been one of 7 erectors at Eramet Porsgrunn Norway. In the period 03.05.2010-24.06.2010 they have erected 2 filters, silo, platform, ducting and various components and instruments such as: screw conveyors, fans, sound isolated house, differential pressure transmitter, etc.

During the erection period it has been important to follow all Health, safety and environment regulations at site according to standards. Good workmanship, flexibility during erection together with communication and cooperation with the daily production personnel at the factory has been important. Maciej Pasturczak has good English communication skills.

Alfsen og Gunderson and the end customer Eramet have been very satisfied with the workmanship and behavior of the erection team during the whole erection period.

Best regards
